

I HEARD YOU THE FIRST TIME...™

Cobra Headset

A role ready, lightweight, universal, boom arm headset

Features

- Modular, lightweight headset that is flexible enough to provide a tailored solution in almost every active or passive military role.
- A range of head fixings making it compatible with infantry helmets, berrets and other headgear, delivering excellent communications quality for every situation.
- Tough and stable making it ideal for high tempo, highly active disounted infantry operations.
- Can be configured, through a range of switches and cable terminations to interface to various radio equipment types matching it perfectly to deliver excellent quality and performance.
- Completely open to provide maximum situational awareness and ventilation to the user
- With a hearing defender locator to enable easy donning of passive hearing protection or communication headsets

Modular and adaptable to suit the role

Lightweight and Comfortable

Provides excellent communications and situational awareness

Rugged and reliable

Interfaces to a range of military radios with a choice of PTT options

TEA Products can be configured for practically any radio or intercom

TEA is an ISO Certified Company that manufactures and sells audio communication products directly to specialized end users such as U. S. Special Forces and Law Enforcement Agencies without involvement from resellers or independent reps. This policy and the unique and custom nature of these products have caused many Federal, State and Municipal Procurement Officers to qualify these as sole source procurements.

I HEARD YOU THE FIRST TIME...™

Modular Cobra Headset System

The Modular Cobra headset system provides the user with personal choice and the flexibility to reconfigure the equipment to suit a specific type of mission. No tools are required and configuration changes can be made in a matter of seconds. The system components are fully ruggedised to withstand the extreme environments encountered in military operations, and human factors considerations have ensured optimum design for lightweight combined with long term comfort. The design also ensures full compatibility with helmets, weapons and other personal equipment.

Tactical Switches for Cobra Headset

Pressel Switch

A rugged and robust PTT good for moderate to extreme environments

U94 Switch

The ultimate ruggedized and universal PTT built for ease of use and durability. Optional upgrade is an Auxillary Input for Remote Switches or a Gas Mask

D Switch

The best PTT switch for Special Forces and SWAT entry applications

Headset

The Cobra headset consists of a small housing into which the microphone boom arm, earpiece and down-lead are assembled. Both the microphone and earphone are mounted on flexible arms to facilitate full adjustment.

Headset Attachments

Four types of head mounting 'carrier' are available which attach to the headset to facilitate different operational activities. This can be achieved in seconds by means of a simple clip, which requires no tools.

Headstrap

A fully adjustable strap to fit around the head is made from a combination of soft cotton and mesh materials to provide comfort and ventilation. It can be worn on bare heads, with berets or under helmets and provides a stable platform for the headset during strenuous activities.

Helmet Clip

A clip to attach the headset to the side of the helmet for combat operations. Ideal for deployment in hot climates where the use of a strap is undesirable.

Headband

An adjustable overhead spring band primarily for use by staff in HQ's and command centres. It can be worn with or without a helmet.
