INVISIO® S10 System

The INVISIO® S10 Headset System allows tactical operators to replace their existing big and bulky boom headsets with the sleeker X5 dual in-ear headset. The S10 Headset System is powered by a single AA battery and can be used with our analog push-to-talk switches that can be adapted for use with practically any 2-way radio.

INVISIO® X5 HEADSET

Patented In-Ear Bone Conduction Technology

The INVISIO® X5 Bone Conduction Headset contains one of the most unique microphone technologies in the world. The X5 is designed to place the bone conduction microphone in the exact spot within your inner ear where the jaw bone meets the ear canal to capture your voice. Effectively speech is transmitted with ultimate clarity and minimal background noise.

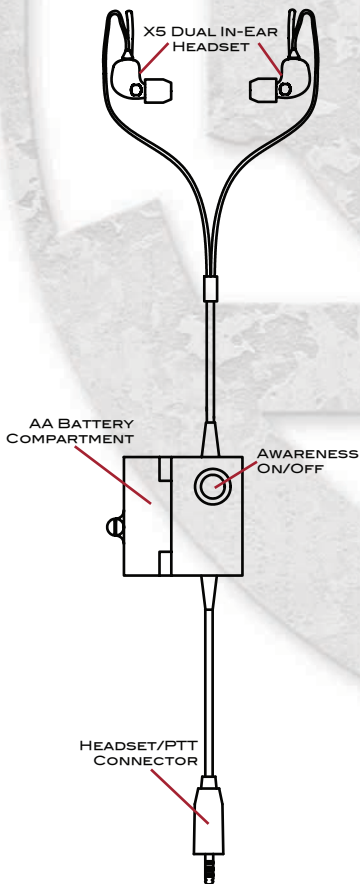

Communication is possible even when your face is covered with a gas mask, respirator, re-breather or even through HAZMAT suites.

State of the Art - 360° Situational Awareness

The X5 has external microphones on each earpiece that allow you to monitor your surrounding environment. The X5's digital sound processors will automatically protect you against damaging impulse noise such as gunfire and explosions by compressing sound above 85dB back down to a non-damaging level.

The X5 is also capable of super enhanced hearing that allows you pick up audible sounds never before possible during tactical operations.

Maximum Attenuation: Comply™ Foam Canal Tips help provide the highest level of audible attenuation with a 29dB Noise Reduction Rating we ensure your hearing stays protected at all times.
