

LASH II

Throat Mic System

Break Away Strap

The break-away elastic strap contains a splash proof throat microphone and the radio receive speaker. This leaves your face and head unobstructed to accommodate gas masks and helmets.

Throat Microphone

The throat mic module picks up vibrations from your voice box and can transmit a whisper at the same level as normal speech. It is insensitive to ambient sound, perfect for high noise environments. The throat mic speaker assembly is supplied in a balanced double plastic module assembly.

Tactical Body Push-to-Talk

The D-Switch is a 2" Round Push-to-Talk that was built for high impact operators and features a protection ring that prevents accidental transmissions

Included

Comply™ A-100 Tip

Sound Tube

Transparent sound tube transports the receive signal from the neck mounted speaker to your ear.
