## HI-Threat Boom MIC Headset

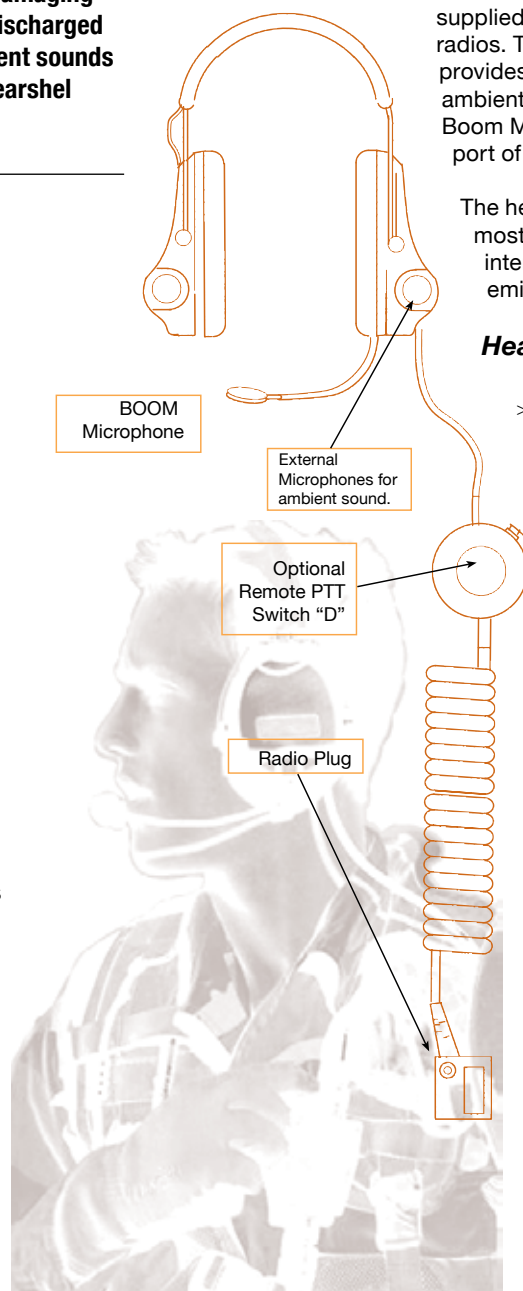

This headset protects your hearing from the damaging effect of the concussion when weapons are discharged. It also provides situational awareness – ambient sounds are replicated or greatly amplified inside the earshell – *Very useful for building clearance.*

### The High Threat Headset is supplied with a Press To Talk Switch (Switch D)

Our best Press to Talk for Special Forces and SWAT entry applications. A two inch round box clips to your chest with either velcro or a strong clothing clip. It has front surface action...which means that you only touch the front of the switch with a finger, elbow, or the back of a weapon to key radio. A removable dough-nut type ring protects the switch from accidental keying of radio if you were to crawl on your belly. A socket on the side of switch lets you plug in a redundant long weapon switch - type RP7 is thumb activated and is especially popular with snipers.

### Generic Specification

A tactical dual phone headset with an integral ELECTRET noise canceling boom mic and silent press to talk switches – chest mounted and/or thumb actuated. Situational awareness is provided by two separate, well-shielded mics for optimum stereo effect and location of sound direction – not related to radio RX. The design must accommodate most tactical helmets, goggles and gas-masks (SCBA) Hearing protection prevents damage of weapon concussion to user's hearing which is achieved without interruption to user's monitoring of ambient sound. The Hearing Protector headset can be supplied to work with all popular portable radios.

The Hearing Protector headset can be supplied to work with all popular portable radios. The noise canceling whisper MIC provides crisp, clear speech even in high ambient noise like helicopter applications. Boom MIC adapters interface to speech port of gas masks & SCBA's.

The headset fits comfortably under most helmets and the whisper MIC can interface with your gas-mask voice emitter when gas is deployed

### Headset Features

- > Fits under tactical helmets; will accommodate gas masks and goggles.
- > Boom MIC adapts to gas masks/SCBA
  - > Tactical PTT – optional hand PTTs
  - > Situational awareness provided by two separate, well-shielded MICs for optimum stereo effect and location of sound direction – not related to radio RX.
- > Sensitivity amplification of ambient noise for building clearance
- > 600 hour battery life – low battery warning indicator.

### Switch D Special features

- > There is no clicking sound when you key the radio.
- > There is positive feedback so that you will have confidence that the radio has been keyed.
- > A socket on the side of the switch D accommodates a redundant finger tip PTT switch type T
- > The dough-nut protects the switch from accidental keying.

## HI-Threat Hearing Protetor

You will be able to hear faint whispers but your hearing will be protected from the concussions of weapon discharge. Twin ear enveloping foam earmuffs are snugly and comfortably positioned over your ears with an adjustable spring headband. They have excellent passive attenuation. Each earphone contains a battery powered micro processor controlled circuit which lets you adjust receive sound sensitivity. Set it on high sensitivity for building clearance. The waterproof AAA battery compartment provides over 600 hours of operation. Separate electronics in each ear shell insure excellent stereo reception so that user can judge both the direction and distance of sound.

New tactical Active Hearing Protectors will prevent damage from weapon concussion while you retain complete situational awareness

Many people in your line of work are more likely to be disabled by hearing loss than they are for close quarter battle. If you agree, you will want the hearing protection provided by the new Swedish Sordin Active Hearing Protector designed for SWAT and Special Forces..

Fit under PASCT and popular ballistic helmets Interface with popular tactical headset such as:

**LASH throat MIC • INVISIO Bone-MIC • Lightweight boom MIC**

Peripheral hearing adjusted with external pads, as well as full stereo reception of ambient sound.

Battery life - 600 hours with two AAA batteries.

### EVALUATION OFFER

Federal, state and local Government Agencies and US Military may request a 30-day evaluation of TEA headsets without any cost or obligation.
